

KGCW2021: Information for Accepted Authors*

In this document, we provide important details regarding Camera-Ready Submission, Presentation, and Registration for accepted papers authors.

(1) Camera-Ready Submission

Please submit the camera-ready version of your paper by April 30, 2021 (AoE timezone).

You have to upload to our [NextCloud folder](#) a ZIP file containing two files:

- paperX.pdf
- AUTHOR-AGREEMENT-paperX.pdf

where X is the submission ID given by OpenReview (if you do not find it, it is also mentioned in the **title acceptance comment or meta-review comment at OpenReview**).

**paperX.pdf* is the camera-ready version of the paper*

**AUTHOR-AGREEMENT-paperX.pdf* is the author agreement.*

A. Paper

When preparing the final version, please incorporate the suggestions from the reviewers, which were provided in the OpenReview acceptance email. Take into consideration the limitations in terms of the size of the papers depending on the type of submission (<https://kg-construct.github.io/workshop/2021/#call>). The camera-ready paper must adopt the style of the Springer Publications format for Lecture Notes in Computer Science (LNCS). Details are provided on Springer's Information for Authors page. Do not include **page numbers**. The paper title should use the **emphasizing capitalized style**: i.e. like "Ontologies for Good Health and Fun" but not like "Ontologies for good health and fun".

The paper must contain a footnote on the first page that designates the paper as being published under the CC BY 4.0 license. The footnote text shall be:

"Copyright © 2021 for this paper by its authors. Use permitted under Creative Commons License Attribution 4.0 International (CC BY 4.0)."

Useful tip:

One of the ways how to achieve such footnote on the front page is to include the following: -

Declare a new command

```
\newcommand\blfootnote[1]{%  
  \begingroup  
  \renewcommand\thefootnote{\footnote{#1}}%  
  \addtocounter{footnote}{-1}%  
  \endgroup  
}
```

- Add just after the first `\section{XXX}` instruction:

```
\blfootnote{Copyright \textsuperscript{\textcopyright} 2021 for this paper by its authors. Use  
permitted under Creative Commons License Attribution 4.0 International (CC BY 4.0).}
```

* Based on ISWC2020 P&D Author instructions document

B. Author agreement

Choose the appropriate template from:

- [AUTHOR-AGREEMENT \(NTP\)](#): Authors shall use this form if they included no copyrighted third-party material in their paper text (or accompanying sources, datasets). This is the right variant in most cases.
- [AUTHOR-AGREEMENT \(TP\)](#): Authors shall use this form if they did include copyrighted third party material in their paper or accompanying material. They must then also attach a copy of the permission by the third party to use this material in the signed author agreement!

You should complete the template, **physically sign with an ink pen on paper**, and submit an electronic scan of your signed paper agreement. **Other forms of signature, such as produced by an electronic stylus, are not acceptable.** An alternative for those without access to printers or scanners, is to fill in the form digitally and to place a hand-signed statement below the form, and then to take a photo of it; see example [surrogate agreement](#).

(2) Presentation

Details on the presentations will be given closer to the workshop. The program will be detailed on the workshop website: <https://kg-construct.github.io/workshop/2021/#program>

(3) Registration

At least one author of each accepted paper must register for the conference. See <https://2021.eswc-conferences.org/registration/>

(4) Questions?

Send an email with your questions or doubts to dchaves@fi.upm.es
